

HINDSIGHTTM

Radar Collision Warning System

Features

- ✓ Provides Audio and Visual Alerts to Avoid Collisions
- ✓ Reduces costs from accidents, injuries and insurance claims
- ✓ Eliminates Blind Spots
- ✓ Designed for Harsh Environments
- ✓ Works in All Conditions; Darkness, Dirt, Fog, Rain, and Snow
- ✓ Integrates with existing monitor and backup camera*

Your Back Up Plan

To circumvent the large blind spots sometimes created from large vehicles, having an extra set of eyes can help mitigate the dangers of not knowing what's behind you.

Ruggedized Design

Effective even in harsh environments, the HINDSIGHTTM system sees through fog, rain, smoke and darkness and can be mounted behind plastic or fiberglass for a discreet look and increased protection.

Customizable Alerts

Audible alerts and the 5 zone visual detection grid can be adjusted to meet the needs of specific work environments where greater sensitivity in one zone is required.

*HINDSIGHT can be purchased with or without monitor and camera to work with a vehicle's existing equipment.
